- Love your pacing, planning, voice. Would like to have modeling more of what safe/unsafe touch – visual of okay touch.
- Keep up the great work!

- Very helpful even though kids do get a little uncomfortable. This program (presentation) really helped a family out in my class a few years ago. Thanks!
- As always, excellent presentation. This info is so important to go over with kids, especially the reference to what they may see on the internet or hear from friends.
- I'm so glad we had your program return to our school. It is so important and there are so many families that do not talk about "safe touches".

- Very good presenter! She was very patient with the kids and kept them on topic.

- Very appropriate language for this age group!
- Mrs. S was such a wonderful presenter. She was very sweet and warm, both of which are necessary when discussing sensitive topics.
- Presenter is very calm, straight forward and matter of fact...this helps with the subject matter and putting the kids at ease. It is great that all 3 "types" of touches are addressed...that some touches are OK and good! I think it puts the kids more at ease during a tough topic. Great checklist for determining a Safe Adult. Video is very relatable for kids...good "real life" with "real kids" example. Bystander kids in video are great too for kids to know what to do in that situation!
- Thank you! Awesome job! You have such a kind way with kids.
- Thank you very much for the presentation today! The children heard the message. The visuals, (your) kind, concerned voice and the video were excellent.

- I am always impressed with the information and how it is presented to our kids. Timely and pertinent for this grade level. Love it!
- Super job!
- Kids need to know that they should let a safe adult know if this happens to them.
- I like the new game/points earned at end of presentation! "What Would You Do?" allows class to be engaged and formulate their responses based on what they know and have learned.
- One young man had this class last year. He came forward afterward to report abuse by his uncle.

- Every year I am impressed by the quality of the presentation. Thank you for your help with such an important topic!
- Worksheets for students with cognitive disabilities.
- The biggest contribution is putting "touches" in words that they can use of they needed. Excellent presentation! I do suggest calling "Nice Tricks" something else like "Pretend Nice Tricks". 3rd graders are programmed about "opposites" so nice is opposite of mean. I do suggest maintaining that it is okay if they have same names on book marks. They are programmed to be creative.
- Thank you for being here today! You did a very good job presenting this sensitive information.
- Thanks for coming and sharing this important information with my students. Mrs. S did a fantastic job!
- Great program. I think the kids understood the importance of telling.

- Having picture cues to help students with cognitive impairments understand feeling – especially those who can't read. Thank you!
- Well-paced, kept student's interest in materials they are well-familiar with.
- Explain the "nice" trick more thoroughly as the person is trying to act "nice" to get you not to say anything. Our 3rd graders may think that a "nice" trick is just that, nice. Eight year olds might not think that deeply to separate nice trick. Also, to stress that John's stepdad did get the help that he needed to take care of his problem. Thank you.
- Ms. B did an excellent job presenting that material. It is so important for our kids!
- It was good to hit the kids with touches again.
- Excellent presentation! Movie is great and touches upon many aspects of abuse. Would highly recommend this program to other schools.

- This presentation was wonderful. In the past we have used a “creepy” video. That made us (teachers) uncomfortable. This is a much better way to teach this topic to children. Thank you.
- The presenter was so caring and genuine. The program was well designed and very age appropriate. The wrist bands were an awesome idea!! Very worthwhile!!
- The presentation was very informative and age appropriate. Great job!
- Very nurturing to students. Information clearly explained so students can understand.
- Nice job! So glad technology is being addressed within the program. Important!
- Mrs. M made an outstanding presentation – handled the “selfish touch” section well with third graders.
- Tanya did an awesome job making students feel at ease and able to share ideas. Good questions during the game for discussion.
- The presentation was comfortable for the kids and they were kept interested!!
- Students were engaged and enjoyed the game! Thank you!
- Very well done! Straight – forward with information but at their level. Liked the “nurturing”, “confusing” and “selfish” touch comparisons. Thank you!
- Thank you! Mrs. M is an excellent presenter. Would you please address the issue of children joking around by touching each other? This might be a more common problem than what we normally consider more severe touching. Boys especially will joke around – they claim they’re all just having fun – both the doers and receivers – but of course sometimes someone’s feelings get hurt, which is immaterial, actually! I would like to see them reminded that if they touch, they are the perpetrators.
- Presenter was very engaging – held student’s attention. Related well with students.
- Mrs. B did a great job with the students. Classroom management was great.
- Well done, and such an important issue.
- Students were very calm and really took in all the info.
- The information was presented in a very positive and comfortable way. Thank you!
- Presenter did a great job approaching a difficult subject, but one all students should know!
- The kids definitely remember the year – to – year progression of the program (the wording/ideas). That’s great.
- Good if it could be combined with abstinence education.
- Kid friendly presentation (appropriate to age/grade). The presenter was thorough, included colorful boards which were easy and interesting. Professional presentation.
- I felt the information was presented well for our class and the information was both appropriate and relevant.
